

FIGURE 1
The autonomic nervous system (ANS) is a part of the peripheral nervous system (PNS) that controls the body's internal organs and functions. It is divided into the sympathetic and parasympathetic divisions. The sympathetic division is responsible for the 'fight or flight' response, while the parasympathetic division is responsible for the 'rest and digest' response. The ANS is controlled by the brain and spinal cord.

FIGURE 2

FIGURE 2 is a schematic diagram of a human torso showing the location of the device 100. The device 100 is shown as a vertical line passing through the rib cage, with a label 102 pointing to the device. The spine is visible, with a label 104 pointing to a vertebra. A label 106 points to the shoulder area. The arm is raised, and the hand is near the head.
